

Customer No.: 31561
Application No.: 10/064,881
Docket No.: 9641-US-PA

REMARKS

Present Status of the Application

The Office Action rejected all pending claims 1-20. Specifically, the Office Action rejected claims 1-20 under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. Applicant has amended specification and independent claims 1, 12, and 16 to correct typo errors, following the suggestion from the Office Action. Claims 1-20 remain pending in the present application, and reconsideration of those claims is respectfully requested.

Discussion of Claim Rejections under 35 USC 112

The Office Action rejected claims 1-20 under 35 U.S.C. 112, first paragraph. The Office Action suggests to use --discharging voltage-- or --discharge voltage -- instead of "discharged voltage".

Applicant has accordingly amended specification and claims. As described in [0033], [0034] and [0036], the discharging voltage can be understood as a kind of reset signal that allows the drivers transistor 102 to be switched off, such that the threshold value of the driver transistor 102 returns to the initial value.

It is believed that the amendments do not add new matter and overcome the rejections.

In addition, even though the pertinent prior art references considered by the Office Action disclose some technologies, they do not equally disclose the features of the present invention.

CONCLUSION

For at least the foregoing reasons, it is believed that all the pending claims 1 -20 of the invention patently define over the prior art and are in proper condition for allowance. If the Examiner believes that a telephone conference would expedite the examination of the above-identified patent application, the Examiner is invited to call the undersigned.

Respectfully submitted,

Date :

Sept. 20, 2005
